The LLAP offers free Radon Test Kits, Long Term and Short Term, as well as radon in Water Test Kits to all Tribal Members and Tribal Employees. January, which is National Radon Month, we heavily advertise through the tribal newspaper, LLBO website, LLDRM website, our Facebook Page, and through email. Those who are interested are invited to our office and we demonstrate know to properly "perform" the test. We have found it's best to they come to our office so we can inform them

more about radon, why we need to test, and what the test results mean.

billboard, in a Reservation wide informational power point distributed by employee email, and by word of mouth. The LLAP has designed an informational pamphlet on the health risks of Radon, Radon testing and Radon mitigation.

RADON GAS is the second leading cause of Leech Lake Air Program (218) 335-7429

TEST YOUR HOME!

> Leech Lake DRM **Air Quality Assessment**

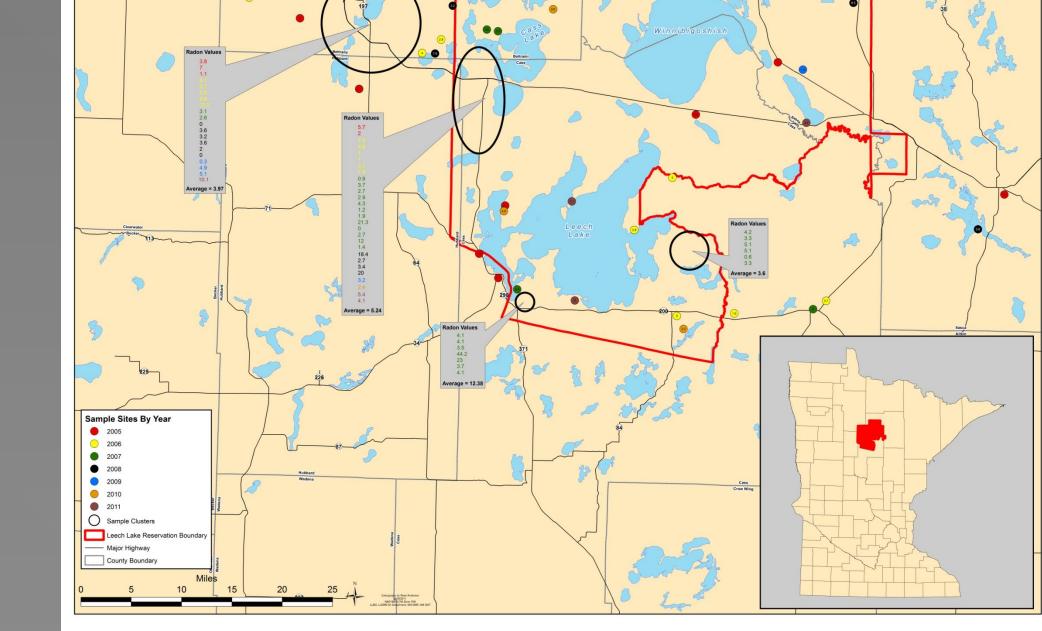

Number of Tests

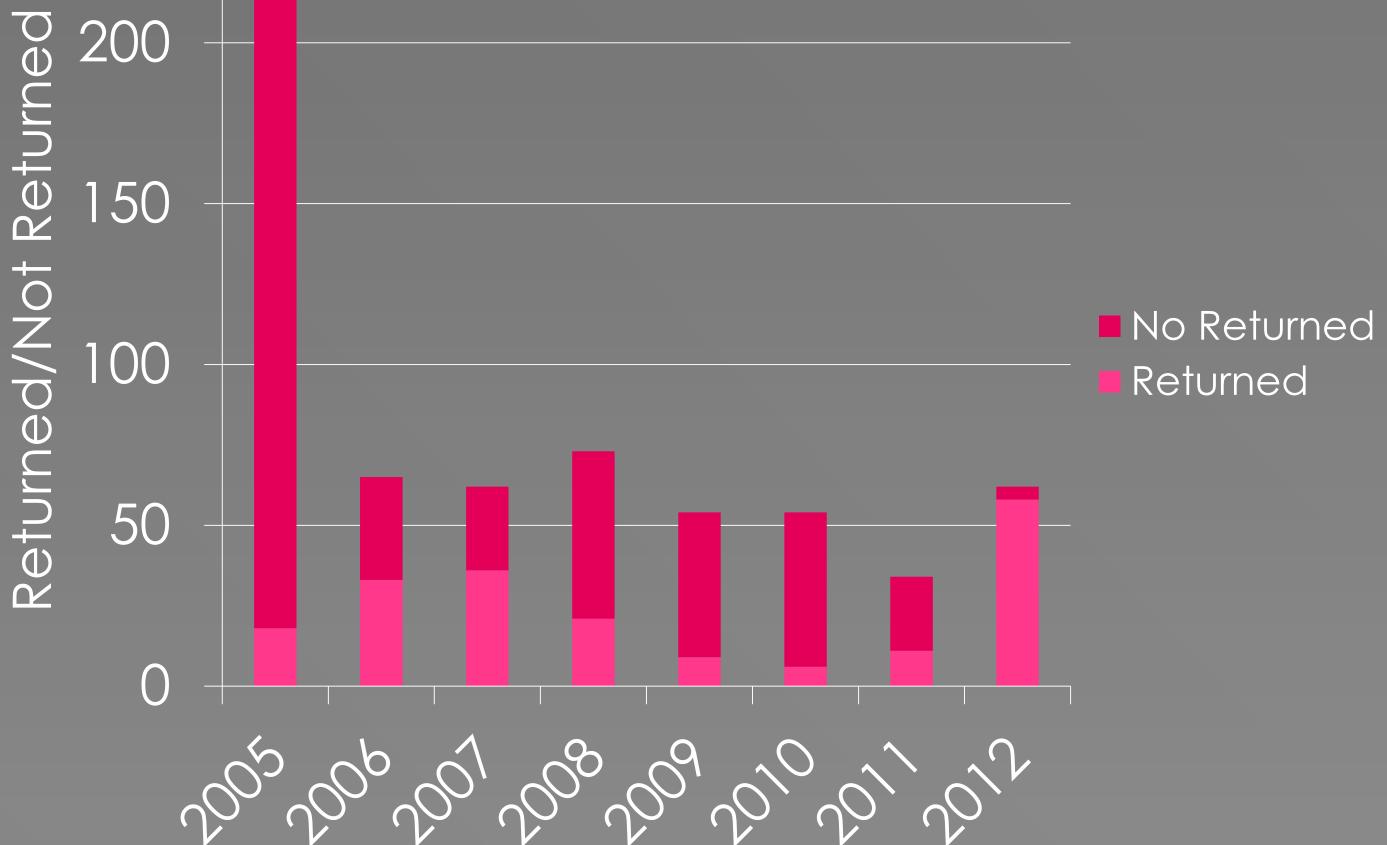

We continue to work with the Leech Lake Housing Authority to build new homes radon resistant new construction (RRNC). 60 new homes were/are being built 2010 through 2012 using RRNC guidelines. The LLAP has tested 37 government buildings including but not exhaustive to: Tribal K-12, head starts, tribal college, elder care facilities, homeless shelter, community centers, daycares, and office buildings. Most of these buildings were under the 4piC/L guideline and those whose values were above were addressed with some type of mitigation. When the buildings have been mitigated, they are post-tested for Radon. All mitigations to date have come back below the 4piC/L guideline.
